Protecting Your Future

Fax (810) 364-6690

Dear Business or Homeowner:

Due to the number of keys required for all businesses in our community it is not practical to carry them on every emergency vehicle that may respond. Likewise to have the key stored at the fire department would cause an unnecessary delay by gathering the key prior to responding, or having personnel return to pick up the key once we found out that no one was on site to allow us entry.

Having access to your building is a great assistance to us. If there is a suspected problem after normal business hours it allows us to rapidly assess your property without causing any unnecessary damage or extended delay waiting for your representative to arrive with keys.

To assist us in providing you with the best possible service, the Fire Department initiated a secure key box system for any owner that would like to grant us access to their building during an actual or perceived emergency. Information on the key boxes from the manufacturer is available for your review. We have numerous businesses and residents that have been taking part in the system for more than 10 years.

Key boxes available for purchase online from [Fail Safe](#).

If you have any questions, or would like additional information, please contact us anytime.

Sincerely,

[Thomas M. Konik](#)

Chief, Department of Public Safety
